

Transforming parking garages into mobility and service hubs.

Radical Innovations Pitch
Ruter, 6 May 2021

A cyclist in a black jersey and helmet is riding a red bicycle on a city street. The background features modern, multi-story buildings under a clear blue sky. The scene is brightly lit, suggesting a sunny day. The cyclist is in the foreground, slightly out of focus, while the street and buildings are in sharper focus.

Available parking is declining.

Drivers in Frankfurt, London and Washington D.C. waste 65 hours searching for parking every year.

**Sustainable cities
require space for
mobility and
services.**

A red car is parked in a parking garage. The background shows many empty parking spaces, illustrating the concept of half-empty garages.

**Residential and office
parking garages are
half empty.**

People are unable to share space efficiently.

Existing access solutions are disconnected, fragmented and costly.

We connect parking garages

Easy access

- ✓ GSM
- ✓ App
- ✓ Automatic
- ✓ Voice control

Sharing space

- ✓ Share when not in use
- ✓ Flexible guest parking
- ✓ Peer to peer rental

3rd party services

- ✓ Mobility services
- ✓ Last-mile delivery
- ✓ Electric charging
- ✓ On-site services

Car sharing

- rent long term parking space
- access garage (in app)
- available for non-residents
- show realtime availability

Last mile delivery

- flexible parcel lockers
- convenient pick-up and delivery
- efficient logistics
- serving local community

On site services

- multiple booking
- economy of scale
- convenience
- new business opportunities
