

NEXT SIGNAL

Ruter Supplier Conference
12th Sept. 2016

Einar Myreng (CEO)
Lars-Cyril Blystad (CTO - PhD)

TravelCompanion

- ❖ Beacon based system for Universal Design.
- ❖ Easier traveling with public transportation using your own mobile device.
- ❖ Travel information with integrated real time information.
- ❖ Special features as audio guide and animated guide for visually and hearing impaired travelers
- ❖ Possible inclusion of mobile payment; Beacon based or NFC.
- ❖ Wayfindr Open Standard compatible.
- ❖ In development.

LocationCompanion

- ❖ Beacon based system for indoor navigation - specifically for Universal Design.
- ❖ Inherited precision level of < 10 meters.
- ❖ Expected significant increased precision levels in near future.
- ❖ Possible inclusion of mobile payment; Beacon based or NFC.
- ❖ Useful as in-vehicle system technology.
- ❖ In development.

In-Vehicle Infrastructure

- ❖ Cloud based administration for beacon content, travelers payment information, travelers pattern tracking and vehicle movement monitoring.
- ❖ Mobile data for cloud communication on travelers side - payment options and real time information.
- ❖ Content maintenance through customized dashboards.
- ❖ Gateway for hardware monitoring.
- ❖ Hardware maintenance either in-house or outsourced to third party.
