

New Technology demands new business models and new knowledge in all business

"The World experience 12 Gutenberg-moments simultaneously", Silvija Seres Nordea/NRK

Autonomous vehicles is a complex hybrid of new technologies

This complexity requires challenges our business models and requires new knowledge

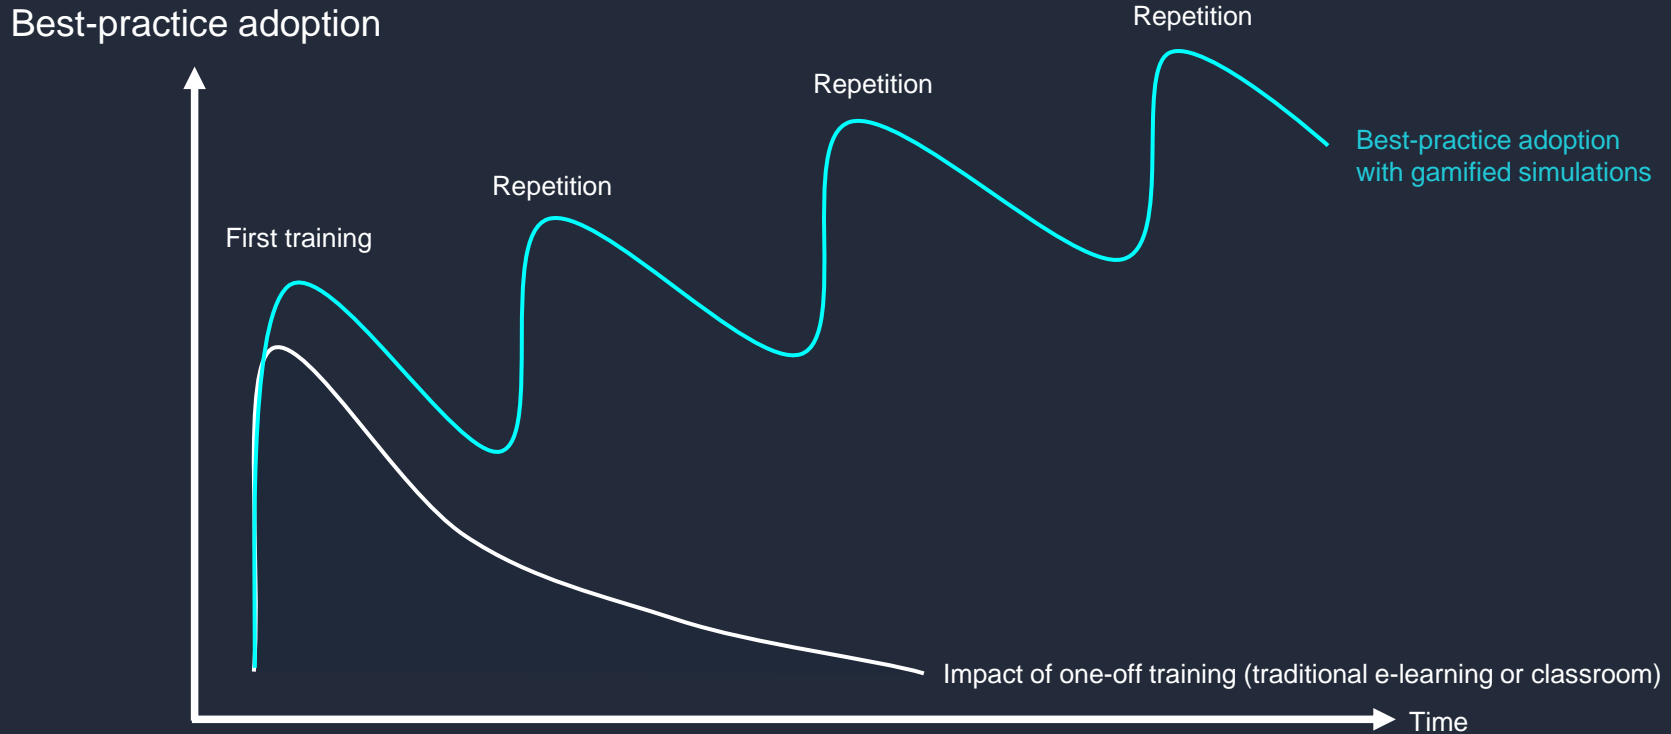

A woman with glasses and a patterned scarf is looking at a tablet held by a man in a plaid shirt. They are both smiling and appear to be in a workshop or office environment. The background is slightly blurred, showing shelves and equipment.

People. Create. Value.

Attensi offers Next generation 3D simulations to enhance business models and build knowledge among customers, vendors, regulators and employees

Attensi helps organizations adapt to new business models and implement best practice

Our solutions are built on three core pillars

1

Realistic 3D environment

Makes the training feel real; narrowing the gap between theory and reality

2

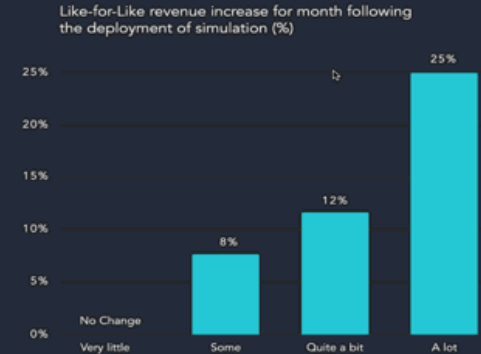

Gamification

Increases learning output from 'active learning' and triggers repetitions

3

Measuring tools

Enables the organization to track learning indicators and real-life impact

Many organizations uses Attensi simulations to enhance and adapt to new business models
